

DuraVision™
Corrections Mirrors

Cell Observation Mirror With CCTV

Even with CCTV systems in place, a DuraVision™ Cell Observation Mirror is the best option for officer safety when about to enter a cell. CCTV is great for remote viewing only.

"The mirror allows officers to maintain a full visual overview..."

The DuraVision™ Cell Observation Mirror can be used very effectively in conjunction with CCTV. The mirror allows officers to maintain a full visual overview of an area before proceeding. This ensures the officers safety and time is saved as it is not necessary to radio back to the CCTV monitor room for confirmation that it is safe for officers to enter a cell.

A DuraVision™ Corrections mirror provides instant real time safe viewing for officers at the cell door which a CCTV system can not provide.

"Real time safe viewing..."
